

## Enhanced labeling design and placement

Quva's ready-to-administer Oxytocin IV bags are updated with redesigned front and back labels, as well as front label placement that covers the diluent bag manufacturers linear barcode so that there is more clarity that Quva's label barcodes are the ones scanned for the necessary compounded sterile product information like lot number, expiry, etc. This incorporates ISMP's best practices on responsible oxytocin use, barcode verification, and medication safety.<sup>1</sup>

### NEW: Front label redesign and enhancements

- Updated label placement and improved adhesive ensures secure coverage of the diluent bag's barcode, reducing confusion and simplifying workflow by presenting a single barcode and expiration date of the compounded sterile product for scanning.
- Concentration expressed in milliunits, supporting more precise titration in clinical settings and aligning with infusion pump dosing nomenclature.
- NIOSH HD indicator added, expanding on the current High Alert designation and improving healthcare worker safety.

### NEW: Back auxiliary label

- Medication name displayed in TALLman lettering, increasing patient safety by aiding clear differentiation of oxytocin IV bags from plain hydrating solutions and magnesium infusions - An ISMP best practice.

## Quva Pharma's Oxytocin Products

PRODUCT #	PRODUCT DESCRIPTION	PRODUCT SOURCE	BUD (DAYS)	CASE QUANTITY
70092106708	Oxytocin 20 Units added to 1000 ml 0.9% Sodium Chloride Solution Bag	Sterile to Sterile	90	12

70092155207	Oxytocin 30 Units added to 500 ml 0.9% Sodium Chloride Solution Bag (PF)	API to Sterile	60	12

### Focusing on Compliance, Safety, and Convenience

Purchasing ready-to-administer oxytocin is a key strategy employed by hospitals and health systems, with 56% of hospital pharmacies outsourcing oxytocin due to difficulties in compounding.<sup>2</sup>

#### Our products help:

- ✓ Reduce the risk of exposure to healthcare personnel, patients, and environment
- ✓ Satisfy both USP 797 compounding regulations and USP 800 regulations for handling hazardous drugs<sup>3</sup>
- ✓ Saves time and cost associated with compounding

## Scale & Capacity to Deliver

- ✓ Sophisticated 503B cGMP quality management system
- ✓ Proven FDA compliance record
- ✓ 300,000+ sq.ft. of capacity across our 4 facilities
- ✓ Licensed to ship in ALL 50 states

## Full-Service 503B Capabilities

- ✓ Full Sterile to Sterile portfolio
- ✓ Supply during shortage for reliability and resiliency
- ✓ Extended Beyond Use Dates (BUD)
- ✓ KitCheck\* RFID tagged products available

## Extensive Portfolio

### Broad Sterile Product Portfolio

Syringes

IV Bags

CADD

Monoject Syringes

L.E.T Topical Syringes

## Classes

- ✓ Anti-Infective
- ✓ Anesthesia & OR
- ✓ Cardiovascular
- ✓ General Medicine
- ✓ Labor & Delivery
- ✓ Pain Management

## Product Types

- ✓ Antibiotics
- ✓ Anticoagulants
- ✓ Cardioplegia
- ✓ Electrolytes
- ✓ Epidural
- ✓ Local Anesthetics
- ✓ Opioid Analgesics
- ✓ Sedatives
- ✓ Vasopressors
