- Patented formulation containing epinephrine*
- The ready-to-administer syringe makes it easy for the operating room team to decant from the syringe and draw up into the surgeon’s preferred syringe and needle combination
- 100 ml total dose¹ is achieved with two 50 ml syringes as each 50 ml contains:
  - 123 mg ropivacaine
  - 0.25 mg epinephrine
  - 0.04 mg clonidine
  - 15 mg ketorolac
- Ready-to-administer syringe:
  - Supports local infiltration anesthesia which is a mainstay of multimodal pain management
  - Eliminates the need to compound in the hospital or mix products in the O.R.
  - 90-day beyond use date helps reduce waste

* Patented formulation

Partner with QuVa Pharma to gain resiliency and reliability for your sterile injectable drug supply

To become a new customer, set up a profile at quvapharma.com/customerprofile

**Scale & Capacity to Deliver**
- Sophisticated 503B cGMP quality management system
- Proven FDA compliance record
